

Brian Dall Schyth

Ph.D., M.Sc., Illustrator,

Comics artist, 2D animator and teacher

Short CV

Short about me

I have always been drawing but coming to education I did not dare to go down that road economically so I followed my other great interests biology and later out of curiosity I took a sidesubject in religion. I have been drawing all the way making postcards, comics, illustrations, a little 3D modelling and beginning 2016 I started a company ExplainWays working with illustration and comics. I love to read comics and books of nearly all sorts, to play the guitar and enjoy family life with my wife and two daughters.
